

Marks Point Residence

webberarchitects
commercial and residential

Located on the northern side of Marks Point overlooking the picturesque still waters of the beautiful Lake Macquarie, this residence enjoys vast water views and direct access to the lake itself. Located near Kindaimanna Reserve and looking north towards Belmont, this renovation was designed to take advantage of the panorama and water soaked landscape.

This residence has an existing double garage at the rear of the property with a paved walkway which converts to a modern timber deck surrounding the home. This two storey home includes three bedrooms and generous living areas. The renovation of the home included a new Walk In Robe and Ensuite, the introduction of a deck, new roof and landscaping. To the north of the residence, the existing open plan kitchen and living areas open on to the new timber wrap around deck which not only surrounds the home but also provides direct access to the glossy lake.

The home's new colour scheme is effective, calming, uncommon and exciting all at once. The blue exterior with white trim is striking and accentuates the timber deck which provides access to the front, side and rear the property. This home stands on its own and also compliments the homes surrounding it, sitting healthily on its lakeside perch.
